### SLEEP MONITORING

Pillow at regular intervals checks and collects information about your sleep. You can then view all the records view your sleep in a clear app.

### CARBON FIBRE HEATING

Never get cold with the Tesla Smart Heating Pillow. The heating can be set up to 57°C. Charging is also possible via a power bank or conventional mobile power adapter.

Tesla Smart for Android and iOS

### BUILT-IN SPEAKER

Among other things, there is built-in speaker inside the pillow. Thanks to it, you can listen to your favourite music, podcast or just turn on the white noise generator.
