Common Symptoms of People Living in Cities

Leg Pain

Cardiovascular Diseases
and Varicose Veins
due to prolonged standing and sitting

Why ELEEELS A1 is Needed?

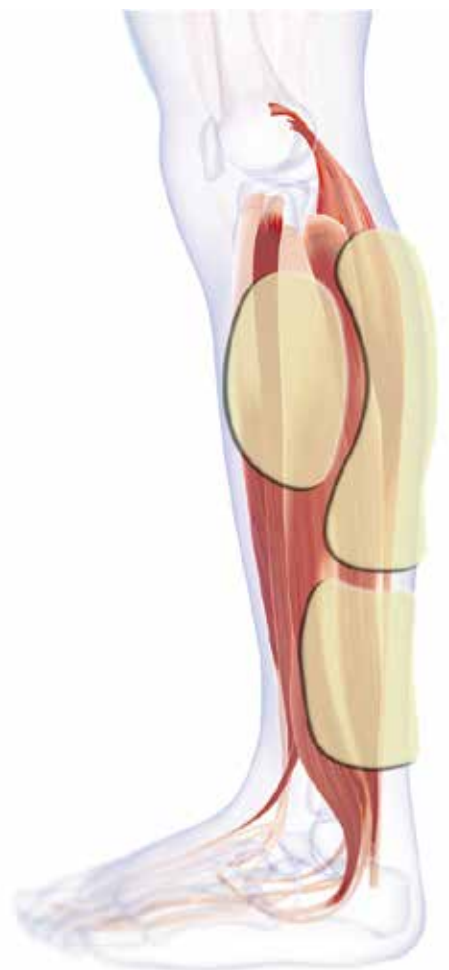

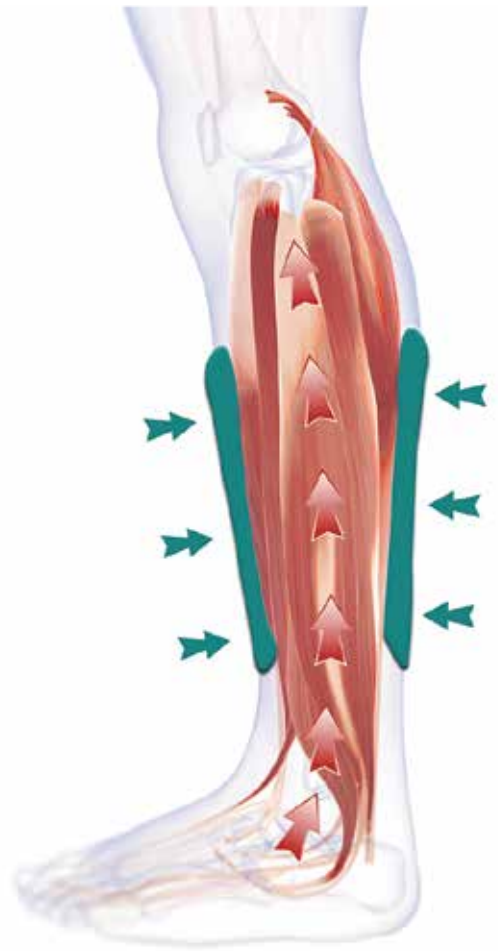

Gravitational forces significantly affect venous return, cardiac output, and arterial and venous pressures. Our legs have the worst circulation in the body. To make things worse, long hours of sitting, walking, running, and standing put further pressure on the feet and legs, which would lead to fatigue, tightness, soreness, varicose veins, and other diseases.

ELEEELS A1 helps to massage your calf muscle, grips and kneads your ankles and heels, squeezes your feet, and grins your shins. With A1, leg pain and other related diseases can be a thing of the past with just 10 minutes of treatment.

Massage for: Calf, Ankle and Plantar

Benefits:

- Relaxes your legs, and be energetic
- Enhances sports performance, and increases muscular flexibility
- Hand-free rehabilitation tools for recovery from muscular strains
- Reduces lymphatic swelling, and prevents varicose veins and leg cramps
- Accelerates vein and lymph back flow, promotes circulation, and enhances metabolism

Massages calf muscle to
relieve fatigue and
improves circulation

Grips and kneads your
ankles and heels to push
circulation flow upwards
through your whole calf

Provides rhythmic air
compression to strongly
squeeze your feet for
ultimate relaxation

Grips your shins to relieve

Features:
